Patch 32 - CSU Read Me Document

Scheduled to be deployed on 3/3/02

Installation Patch 32 - CSU

This patch will include Client side changes. The client for Patch 32, along with the instructions for loading it, are attached with this document in the Read Me distribution e-mail.

Patch 32 to include the following:

Remedy Problem Ticket

4225   While trying to restrict select of Employee Roster report received WHEN-BUTTON-PRESSED trigger raised unhandled exception VALUE_ERROR. Variable size could not handle more than 3 parameters. Increased the variable size to eliminate the value error.

5407   VET_PREF_RIF is being populated from CIVDOD_PER_OTHER_INFO.pei_information26. Modified CRPACK to populate VET_PREF_RIF from GHR_US_PER_SF52.pei_information5.
Note: VET_PREF_RIF for Local Nationals is populated from CIVDOD_PER_LN_MIL/VET/INFO.pei_information5 and the data stored is all numeric.

Change Request Transmittals

04-ARM-007   Changes to EMPLOYEE, CIVILIAN POSITION, NAF POSITION, REGIONAL RPT DATA, EMPLOYEE APPRAISAL ALL, EMPLOYEE APPRAISAL CURR, and EMPLOYEE APPRAISAL HIST tables. Changes to EMPLOYEE SECV, CIVILIAN POSITION SECV, NAF POSITION SECV, REGIONAL RPT DATA SECV, EMPLOYEE APPRAISAL ALL SECV, EMPLOYEE APPRAISAL CURR SECV, and EMPLOYEE APPRAISAL HIST SECV views.

02-137-NGB   New EUL data prompts for NG CIVILIAN, NG EMPLOYEE, NATIONAL GUARD PROFESSIONAL DEVELOPMENT, and NATIONAL GUARD REASSIGNMENT folders. Data item NG_AR_PROF_MIL_CRSE_LAST dropped from NG EMPLOYEE folder.

Test Director Problem Reports   Test Director Problem Reports

7639   Data items New Payroll Nbr and Old Payroll Nbr on Supplemental form do not display correct data. Information for Air Force local nationals will never display. CSU is using an obsolete context to populate table. Information on Navy and Army local nationals will display. But, all data gets populated on ARMY_EMPLOYEE table and may not be available to external Navy users. The display size for Hours Scheduled on the Work Sched/Hours canvas on the Basic form (CSUBAS) is too small. CSU is mapping to obsolete Legacy data names not the new combined Modern data names.

Solution: Add data items LN_PAYROLL_NR_OLD and LN_PAYROLL_NR_NEW to EMPLOYEE table. Change CRPACK to populate LN_PAYROLL_NR_OLD and LN_PAYROLL_NR_NEW on EMPLOYEE, ARMY_EMPLOYEE, NAVY_EMPLOYEE, and AF_EMPLOYEE tables. Change CSUSUP form to use EMPLOYEE table to properly display LN_PAYROLL_NR_OLD and LN_PAYROLL_NR_NEW. Delete column WRK_HRS_WK_FRACTION from BASIC_PAY table. Change column LN_WORK_HRS_WK_FRACTION to HRS_SCH_WORK. Change CRPACK to populate HRS_SCH_WORK on tables WORK_SCHEDULE and BASIC_PAY. Use AEI context CIVDOD_ASG_ADTL_INFO item AEI_INFORMATION11 for appropriated personnel and AEI context CIVDOD_ASG_LN_ADTL item AEI_INFORMATION11 for local national personnel to populate properly. Change The display size for Hours Scheduled on the Work Sched/Hours canvas on CSUBAS form to display Hours Scheduled correctly.

Miscellaneous Updates

This patch includes modifications to the User's Guide.
The standard version of Discoverer is now 4.1.
The normal weekend refresh will be rescheduled to run after the patch has been completed. Please ensure

that the servers, both HR and CSU, are available from 1800 Sunday to 0300 CST on Monday morning.
